DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest a pitch sensor having a flowable material contained within a housing chamber and through which electrical connections between the electrically conductive members are made such that, in each different mode of operation of the pitch sensor, a ratio between an electrical property of one of the members and a second member to the corresponding electrical property of a third member and the second member is indicative of displacement of said flowable material within said housing chamber, wherein all of the modes of operation of the pitch sensor utilize different combinations of the conductive members, whereby the pitch sensor is capable of generating an output voltage indicative of such material displacement for each mode of operation, as recited in the independent claim 1 and in combination of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
